

WWRS Quick Reference for Redistribution Order (RDO)

A unique Redistribution Order (RDO) Number identifies each RDO. The RDO number is constructed by the PMO in the same manner as a standard MILSTRIP document number. The only exception is that the serial number begins with a "W". RDOs are created for each order received for a particular NSN (RDO consolidation by NSN occurs when orders are received on the same day). Also, RDOs have one or more line numbers. An RDO may have more than one line number when either the material requested has a different unit price or when the material has been listed by the seller more than once (with different part numbers). The RDO Number and the RDO Line Number is also used to track orders by seller and are printed on labels affixed to shipments called forward to the In-transit Inspection Point (IIP). If the seller exceeds W999 orders in a single day, the serial number will roll to WA01 and continue to WA99, followed by WB01-WB99, in sequence.

EXAMPLE:

DBNXYZ6227W001

<u>D</u>	SERVICE CODE
<u>BN</u>	COUNTRY CODE
<u>X</u>	MARK FOR CODE
<u>Y</u>	DELIVERY TERM CODE
<u>Z</u>	TYPE ASSISTANCE CODE
<u>6227</u>	RDO JULIAN DATE
<u>W001</u>	RDO SERIAL NUMBER

For more detailed information refer to the [WWRS User Guide](#), Chapter 7- Requisition / RDO Processing.
